

Analysing Schemes of Ministry of MSMEs and creating Prototype for National Portal

Description of the Project

The Project focussed on analysing the MSME schemes and provided inputs to the Government. It aimed at preventing the duplicacy of efforts by the Government which was neither beneficial to the MSMEs nor to the Government.

The Project covered creation of an easy to understand guide for MSMEs on various schemes for the Ministry to post it on the website that would result in an increase in the usage of schemes by the MSMEs. Different parameters like ***scheme description, how to apply*** and ***who can apply*** were considered to standardise the schemes for the portal.

MSME Schemes

1) Advisory and consultancy services by Coir Board.

Related Scheme: Scheme for Trade and Industry
Related Functional Support
